Section 1: Fundamentals of Pediatric Anesthesia

Chapter 1: Physiology and Pharmacology of Pediatric Patients

Pharmacokinetics of antibiotics in pediatric and neonatal intensive care

DEVELOPMENTAL PHARMACOKINETICS

CRITICAL-ILLNESS RELATED PHARMACOKINETICS

age

weight

size

body surface area

weight, diameter
kg (male)
kg (female)

altered renal clearance

with/without organ support systems

whole body sympathetic response

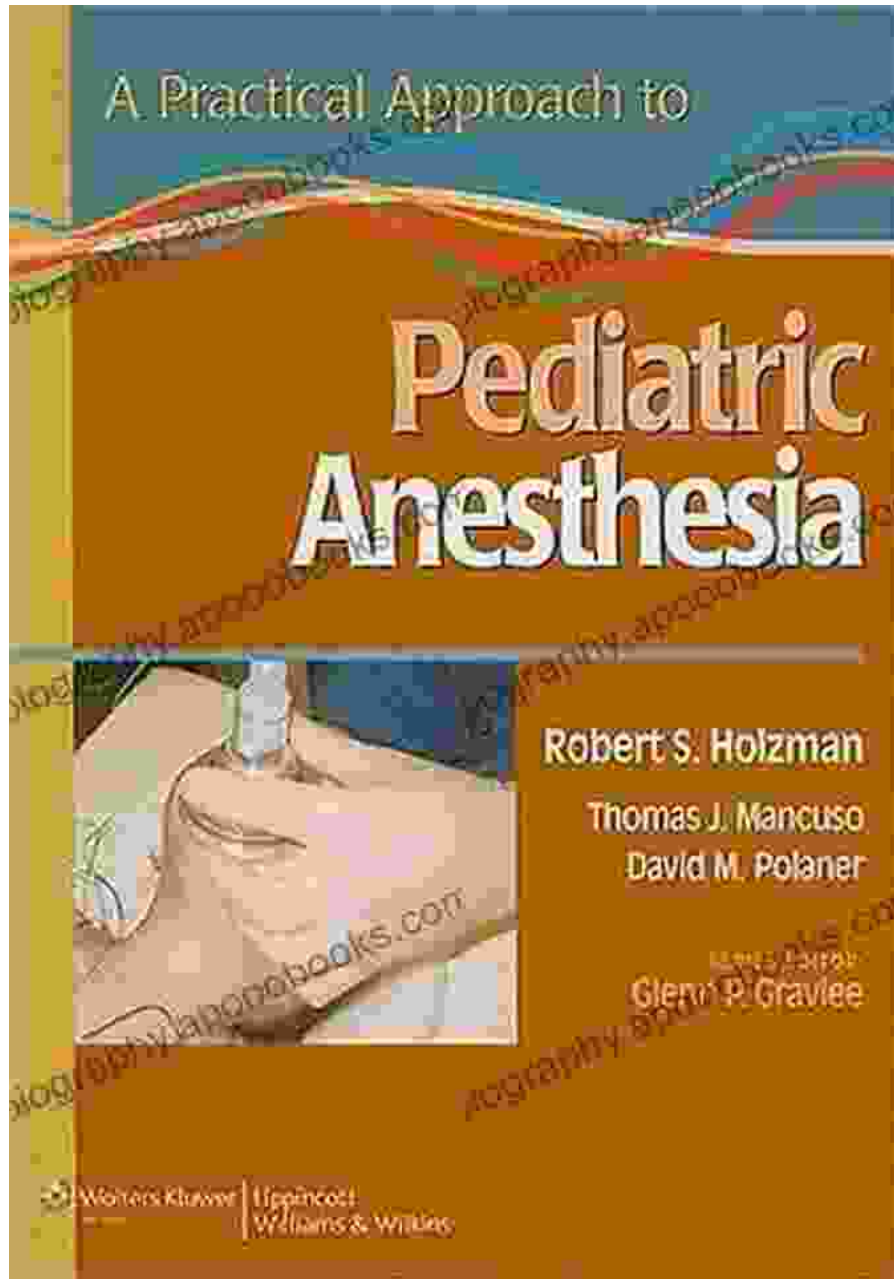

This chapter explores the unique physiological and pharmacological considerations in children, including differences in anatomy, organ function, and drug metabolism.

Chapter 2: Preoperative Evaluation and Planning

This chapter guides healthcare professionals through a comprehensive preoperative evaluation, including history taking, physical examination, and laboratory investigations.

Chapter 3: Anesthetic Techniques

This chapter presents a detailed overview of anesthetic techniques used in pediatric patients, including general anesthesia, regional anesthesia, and sedation.

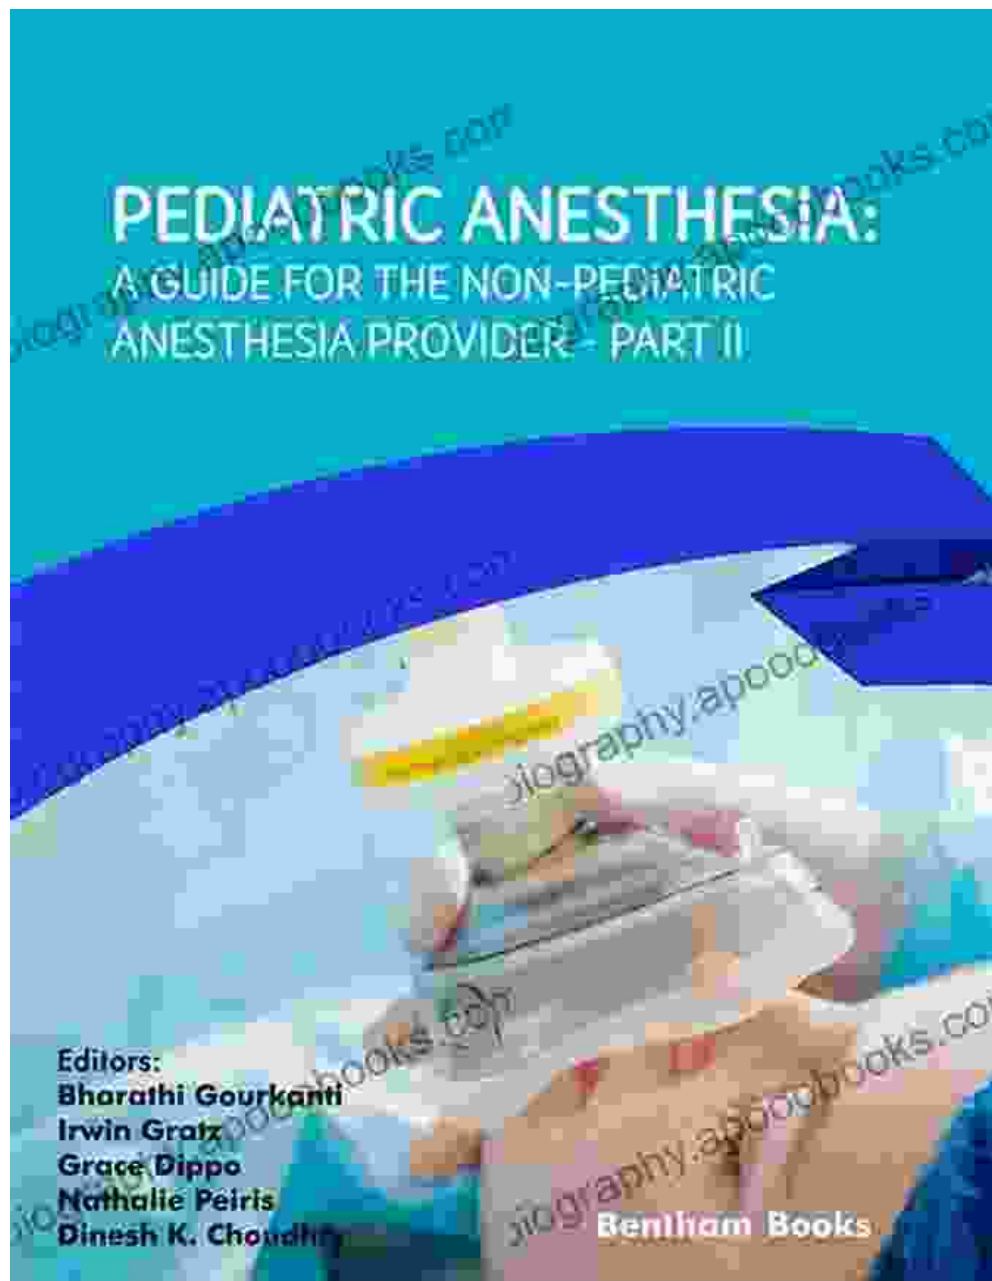

Section 2: Pediatric Surgical Procedures

Chapter 4: Anesthesia for Cardiac Surgery

This chapter focuses on the anesthetic management of children undergoing cardiac surgery, including preoperative preparation, intraoperative monitoring, and postoperative care.

Chapter 5: Anesthesia for Neurosurgery

This chapter discusses the anesthetic considerations for children undergoing neurosurgery, including preoperative evaluation, choice of anesthetic technique, and postoperative monitoring.

Chapter 6: Anesthesia for Orthopedic Surgery

This chapter provides guidance on the anesthetic management of children undergoing orthopedic surgery, including pain management and postoperative rehabilitation.

Section 3: Special Considerations

Chapter 7: Anesthesia for Children with Congenital Heart Disease

This chapter addresses the anesthetic challenges and considerations for children with congenital heart disease, including preoperative assessment, intraoperative monitoring, and postoperative management.

Chapter 8: Anesthesia for Children with Cancer

This chapter focuses on the anesthetic management of children undergoing cancer treatment, including preoperative optimization, intraoperative considerations, and postoperative care.

Chapter 9: Emergencies in Pediatric Anesthesia

This chapter provides a comprehensive guide to managing emergencies in pediatric anesthesia, including airway management, cardiovascular emergencies, and neurological emergencies.

This comprehensive guide to pediatric anesthesia is an invaluable resource for healthcare professionals involved in the care of pediatric patients undergoing surgery or procedures requiring anesthesia. Its in-depth knowledge, practical insights, and expert guidance empower healthcare providers to deliver optimal anesthetic care, ensuring the well-being and safety of their young patients.
